Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4, 7-13, and 16-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over **Wolff-Mooij, U.S. Patent No. 4,610,469, in view of Mayer, and in further view of Gerrone and Dehdashtian, et al.**

The Wolff-Mooij Patent does not disclose a connector body configured as a Y-shape connector. However, the design of Y-shape valve connectors is conventional as evidenced by the teachings of Mayer. The Mayer Patent demonstrates in figure 6 that enhancing a valve-connector design with an additional Y-connector is conventional in the art.

Based on the conventionality of Y-connector designs, it would have been obvious for a person of ordinary skill in the art to enhance the Wolff-Mooij connector structure with the addition of a Y-connector. Accordingly, such modification would have been considered an obvious design alternative.

In relation to the amendment of claims 1 and 13, the addition of the phrase **"at least a portion of said valve body being located on an exterior of said valved connector"**, does not place the claims in condition for allowance. Based on the teachings of Gerrone and Dehdashtian, et al., for a person of ordinary skill in the art,

Art Unit: 3763

modifying the structure of the cannula valve disclosed in Gerrone with the capability of having a portion of the valve body located on an exterior of the valved connector would have been considered an obvious design alternative based on the teachings of Dehdashtian, et al. In figures 1 and 4, the Dehdashtian, et al., Patent demonstrates the conventionality of valve designs having at least a portion of the valve body located on an exterior of the valve connector. Please note that in figure 4 there are two valve portions with one valve portion outside the valved connector.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
